EXTRUSION SYSTEMS

The Extrusioners

Lip Scraper

Cleaning Tool for Extrusion Dies

The lip scraper reliably removes production residues from the die lips during ongoing operation. Regular cleaning prevents uncontrolled dripping onto the finished product and increases production reliability.

Lip Scraper

Cleaning Tool for Extrusion Dies

Typ	Manual or motorized cleaning tool for die lips
Applications	Removal of deposits and residues on die lips, usable in extrusion and coating processes
Features	- Gentle removal of production residues - Targeted cleaning without interrupting production - Extended service life of the system - Improved product quality through clean die lips - Reduced waste - Consistent cleaning performance without interference from the external decking position
Options	Customization to specific die and production requirements
